

We understand that there are proposed changes that might interrupt the services we currently receive from the K-love radio network. We understand that new rules might allow Low Power FM services to take priority over the translator service we now appreciate so much.

We respectfully request that you not allow LPFM stations to interfere with or replace the translator services that we so enjoy.

Our family really counts on stations like K-love to broadcast on translators to our local area and feel it is in the public's best interest to keep them on the air to bring us family-friendly broadcasting in an era where there is not much real family broadcasting available.

Your help in this matter would be greatly appreciated.
